

Erin – I'm so sorry for dropping the ball on getting back to you. I guess the meeting with Karen is off since she's retiring. However, I still think it would be useful for us to meet sometime and discuss the 404 permit. I'm swamped with internal review of the EIR/S chapters for the whole month, and of course there's the holidays. How about we shoot for early January? Perhaps we could ask Susan to join us. I've met her a few times and she seems very knowledgeable and personable.

Hope all is going well.

Cassandra

Hi Cassandra,

Thanks for your message and heads up about the December 3rd meeting with JM.

Karen Schwinn invited me to it but I'll be returning from a short trip that day and won't be able to join you. I'll be away Nov 29th - December 3rd. I think your idea about meeting before the November Meral meeting is good.

Have you met the new Corps employee yet? Susan is her name, if my recall is working correctly. If you don't get a chance to before we meet, maybe that will be a good time for you to meet her as well.

Hope you had a great weekend!

Erin

Erin – No worries, I've been crazy busy too, so I haven't been good on keeping up with my emails. I appreciate you forwarding the letter. As I'm sure you know, Jerry Meral is meeting with Karen next month to discuss the project. Perhaps it would be best if we could meet before that to discuss your concerns. I suggest we include the Corps in the discussion. I'm thinking we may want to try for the last week of November. What do you think?

Thx, C.

Hey Cassandra,

I'm sorry I wasn't able to meet last Thursday and that it has taken me so long to get back to you. I'd still like to meet with you and just talk about our perspective on CM1 OPP. We provided input to the Corps in a letter that is attached.

If you are still interested/able to talk about this, I am happy to walk over at a time that is good for you. Tomorrow I am in Davis for a few meetings and then I'll be at the State Board workshops the 13th and 14th. If you are attending those, maybe we could find some time to talk there? Or the my schedule is open the 15th and 16th next week before 2 PM.

Hope all is well,
Erin

Okay, I'm so glad you've got some time. Thursday at 10:00 AM? It shouldn't take too much time. If that doesn't work, I can do 1:00 on Thursday too. I'm out of the office next Friday.

Hope you enjoy your weekend -- it's a beautiful day to be outside!

Glad I could clarify, it's just so crazy I can't even keep it all straight all the time.

Sure, I'm happy to chat sometime. Perhaps we don't have too different a perspective, it may just be lost in translation. I'm off tomorrow on my furlough day, and in SF on Monday. At this point my schedule is wide open on Thrs and Friday. So let me know what works for you.

Thx, C.

This is really helpful, thanks. It's way more clear than mud :).

We probably should talk soon about the overall project purpose for CM1. Too bad we didn't have today's meeting after all! Our agencies have different perspectives and I just want to explain ours to you. I'd be happy to walk over to you or we can talk by phone. We probably still won't agree but hopefully you'll understand our point of view.

Talk to you soon,
Erin

No problem. Give me a call if you want to discuss this issue.

There will most certainly be a new operating scenario for Alternative 4, since the agencies are working together as we speak to develop something that is "permittable". Essentially, once the EIR/S is final and a preferred alternative is selected we will have a project with a defined alignment corridor and an operating scenario for CM 1, and programmatic descriptions of CM 2-22 (I'm not sure if it's still 22 CMs or more now). We will be requesting 404 authorization to implement CM1, and will be developing various alternatives to that project for the 404b1. We will also be doing additional NEPA and permitting for implementation of the restoration identified in the other CMs.

Hope this is clear as mud ☺

Hi Cassandra,

Thanks for getting back to me so quickly; I really appreciate it. We are discussing the overall project purpose statement for the delta conveyance project with the Corps. One of the difficulties is that the term "CM1" is being used in the overall project purpose statement but the description isn't complete. Then it is not clear exactly what the Corps is concurring with in the overall project purpose statement that DWR proposed. One of the things I'm curious about is whether or not CM1 will include a scenario for operations that is different from February 2012?

Can you share the description/definition of CM1 with us when it is complete?

Thanks again for your help this morning.

Erin

Erin – They are still updating the description because the agencies are still working out the operations for alternative 4 of CM1. I don't know that the purpose and problem statement descriptions will change much, it will mostly be changes to Alternative 4 in the EIR/S. This alternative will have the new operations and updated facilities (e.g. 3 intakes and gravity flow) from the July announcement.

Thanks, C.

Hey Cassandra,

Thanks for your help. I have the February version from the BDCP website. I was hoping you had a description of CM1 after the July announcement. I appreciate your help,

Thanks,

Erin

Erin – No problem. I've asked Jessica to pull out the descriptions from the BDCP and the BDCP EIR/S. She's going to send you descriptions from the February version, but we will see if we can follow-up with something more recent, since there have been changes to the operating scenarios for CM 1.

Thx, C.
